

Lions Screen Kids Sight Revised COVID-19 Protocol for 2022-2023

Here is the revised COVID-19 safety protocol we propose for vision screening the schools in 2021-2022 in addition to any requirements that the schools may have. You will need to confer with each school to see what protocols they will have.

Lions Proposed Protocol:

- We recommend using facemasks while vision screening the students. Discuss this protocol with each school.
- We recommend using social distancing whenever possible between the vision screening stations.
- We will have hand sanitizer available for team members.
- We will have bleach based cleaning spray bottles or disinfecting wipes available for routine cleaning.

Notes:

Portable sneeze guard panels for vision are available for each kit.

Each kit in 2020 will have an additional tote available with COVID-19 safety supplies.

The contents will include:

Face masks, nitrile gloves in several sizes, hand sanitizer, Clorox spray cleaner with bleach, paper towels and disinfecting wipes.
